KENNETH JARAMILLA

SENIOR FULL STACK DEVELOPER AND CERTIFIED SCRUM MASTER

San Juan City, Metro Manila, Philippines | kennethjaramilla@outlook.com | +63 917 890 4897 | github.com/kennjaramilla

PROFILE

Full stack developer with 12+ years of building data-driven web apps with React, TypeScript and Node.js. AI is at the center of how I work: I use AI coding tools every day to plan features, debug, refactor, write tests and documentation, and learn unfamiliar code fast. I review every change myself before it ships. Comfortable working async, writing clear updates and owning features from idea to production.

SKILLS

AI Development: Claude Code, AI-assisted debugging, refactoring, test and documentation writing, architecture planning

Front End: React, TypeScript, JavaScript (ES6+), Vue, Nuxt, Angular, HTML5, CSS3, SCSS

Back End: Node.js, .NET, PHP, REST APIs, webhooks

Deployment: Vercel, Azure

Workflow: Git, GitHub branching, pull requests and code reviews, Jira, Cypress, Scrum, async collaboration

EXPERIENCE

Freelance Full Stack Developer — Sep 2022 — Present

Remote

- Build data-driven web apps for clients in insurance, payroll and e-commerce, including dashboards, forms, data tables, APIs and backend services.
- Built homepage and storefront pages for e-commerce clients, and a lead qualification and booking flow in GoHighLevel with automated email follow-ups.
- Use Claude Code daily across the whole cycle, from planning and debugging to tests and docs, reviewing every change for quality and security.
- Help client teams run Scrum ceremonies and step in as backup Product Owner when needed.

Tech: React, Vue 3, Angular, TypeScript, Nuxt, SCSS, Node.js, .NET, PHP, Azure, GoHighLevel

Senior Software Engineer, Infor PSSC — Mar 2021 — Sep 2022

Taguig

- Delivered new features, bug fixes, release testing and beta support for enterprise web products.
- Served as Scrum Master, running daily stand-ups, sprint planning and retrospectives.

Tech: Angular 12, React 17+, TypeScript, SCSS, GitLab, Jira

Engineer, Samsung Electronics — Sep 2018 — Mar 2021

Taguig

- Led the design, development and delivery of front-end components for web apps and device interfaces.
- Acted as sub-team lead and set code standards, and facilitated sprint planning and stand-ups.

Tech: React 16+, Vue, Angular 7+, AngularJS, TypeScript, SCSS, GitHub, Jira

Technical Analyst I, Solutions Exchange Inc. — Jan 2017 — Aug 2018

Makati

- Designed, built and shipped reusable React components used across client projects.
- Mentored junior developers during project ramp-up and live demos.

Tech: React 15+, SCSS, GitLab, Redmine

Software Engineer, MobileGroup Inc. **Jul 2014 — Jan 2017**
Makati

- Built front-end and back-end features, and led user research and design for client projects.

Tech: PHP, JavaScript, HTML, CSS
